

NexusTek Hybrid Cloud Services

Secure Your Cloud. Protect Your Business. Know Your Risks Before They Become Incidents.

NexusTek Cloud Security Posture Assessment

Identify, prioritize, and remediate security risks before they impact your organization with NexusTek's **Cloud Security Posture Assessment (CSPA)**. Using Microsoft's Cloud Security Benchmark, Zero Trust principles, and Defender for Cloud insights, we help organizations assess and strengthen security across Azure, Microsoft 365, and hybrid environments.

WHO IT'S FOR

CISOs and Security Leaders

Driving security risk management and compliance.

IT Directors and Cloud Architects

Responsible for securing Azure and Microsoft 365 environments.

Compliance and Risk Officers

Focused on regulatory readiness and governance.

Mid-Size Enterprises

Seeking to strengthen security posture before scaling cloud adoption.

KEY BENEFITS

Gain Full Visibility Into Cloud Security Risks

Across identity, data, apps, and infrastructure.

Prioritize and Address Critical Gaps

With an expert-built remediation roadmap.

Strengthen Your Zero Trust Security Posture

Align to Microsoft's best practices and architecture frameworks.

Improve Compliance Readiness

Validate security controls against industry standards.

Enable Executive-Level Decision Making

With clear, actionable reporting and business alignment.

Reduce Risk Across Hybrid and Multi-Cloud Environments

With a security-first strategy.

HOW IT WORKS

Security is the foundation of every cloud transformation, yet many organizations move to Azure or Microsoft 365 without fully understanding their risk exposure. NexusTek's **Cloud Security Posture Assessment (CSPA)** provides a **comprehensive security review** of your Microsoft cloud environment—aligned to Microsoft's **Cloud Adoption Framework, Well-Architected Framework**, and **Cloud Security Benchmark**.

Our team of certified cloud security experts works alongside your stakeholders to evaluate security configurations, policies, operational maturity, and compliance alignment across identity, devices, data, applications, and infrastructure.

Using a combination of workshops, automated security tooling, and expert analysis, we assess:

- **Identity & Access Management:** Entra ID (Azure AD), MFA, Conditional Access, and Role-Based Access Control (RBAC)
- **Threat Protection Capabilities:** Microsoft Defender for Endpoint, Office 365, Identity, and Cloud Apps
- **Governance & Policy Enforcement:** Azure Policy, Compliance Manager, and Secure Score alignment

- **Regulatory and Industry Compliance Readiness:** HIPAA, ISO, NIST, and other frameworks
- **Security Operations & Monitoring:** Defender for Cloud, Sentinel readiness, and incident response capabilities

You'll receive a **comprehensive security assessment report**, including:

- Executive summary with risk prioritization
- Detailed findings across identity, data, infrastructure, and governance
- Security score benchmarking and gap analysis
- Remediation roadmap with actionable next steps
- Optional remediation support and managed services proposal

This assessment equips your team to move forward with **confidence, visibility, and expert-backed recommendations** to secure your Microsoft cloud environment.

FEATURES

Identity & Access Management Assessment
MFA, Conditional Access, SSO, RBAC.

Microsoft Defender Security Review
Endpoint, 365, Identity, Cloud Apps.

Azure Policy & Governance Review
Policy enforcement and regulatory alignment.

Compliance Gap Analysis
HIPAA, ISO, NIST, and industry standards.

Defender for Cloud & Secure Score Benchmarking
Security Remediation Roadmap
Prioritized, actionable next steps.

Executive Summary Report
Risk insights for technical and business leaders.
