nexustek

STOP EMAIL THREATS BEFORE THEY REACH YOUR BUSINESS

Email remains the #1 entry point for cyberattacks. Threats are escalating in both volume and sophistication:

68%
of attacks originate from email.[1]

22%
Phishing saw 22% YoY growth in 2025[2], averaging $4.8m in damages.[3]

25%
Ransomware experienced a 25% YoY increase[4] and extorted >$724m in 2025.[5]

30%
Business email compromise (BEC) rose 30% in 2025, and caused $4.9 million in damages.[6]

As attackers automate with AI and expand into collaboration tools, businesses need a modern, proactive defense that stops threats before they ever reach users.

Attackers are using AI to craft highly convincing phishing and social engineering campaigns that bypass legacy filters.

Collaboration platforms, such as Teams, SharePoint, OneDrive, and Slack have become major attack surfaces.

Many IT teams struggle to respond because of talent shortages, tool complexity, and outdated protections.

WITH 98% CUSTOMER SATISFACTION,

NexusTek delivers the security technology and operational expertise required to make security work:

24/7/365 SOC Monitoring & Response
Continuous threat detection, investigation, and action by certified analysts.

Managed Policies & Optimization
Configuration, tuning, updates, and best practices—handled for you.

Faster Investigation & Remediation
Reduce time to repair with guided response and expert threat analysis.

Integrated Cybersecurity Ecosystem
Seamless alignment with NexusTek's broader **cybersecurity portfolio** for stronger protection.

Business-First Protection
Safeguard your revenue, reputation, and continuity—not just your mailboxes.

nexustek

AI Email and Collaboration Security

Complete protection from all threats on a single platform

Full Visibility
Granular visibility and threat forensics

Non-Disruptive
Rapid rollout with no MX record changes, and no disruptions

Account Protection
Advanced credential and account-takeover protection

Improved Security
AI-driven phishing, malware, and social-engineering prevention

Total Coverage
Protection across email, Teams, SharePoint, OneDrive, and more

Strategic Prevention
Zero-day threat detection with inline prevention

Why NexusTek Email Security is the right choice for your business

Trusted by hundreds of businesses nationwide, NexusTek AI Email Security delivers:

Inline prevention that blocks phishing, malware, and social engineering prior to delivery, unlike API-only tools that react post-attack.

End-to-end protection that secures email, Teams, SharePoint, OneDrive, Slack, and more—preventing the spread of threats.

AI and global threat intelligence that utilize advanced AI, NLP, and a global network to enhance detection accuracy and minimize false positives compared to traditional email gateways or single-engine APIs.

THE RESULTS YOU CAN EXPECT

A stronger, more resilient email and collaboration environment—powered by artificial intelligence and managed end-to-end by NexusTek specialists.

Protect your business from today's most persistent threats with NexusTek AI Email Security.

Ask your NexusTek representative to schedule a solution briefing.
